Professional

Maven - Front-End Developer Intern

2018 - Present

A startup at UC Irvine's renowned Wayfinder Incubator that facilitates vocabulary acquisition for developing readers.

- A mobile app development in **React Native** environment with **Node.js** and **MongoDB** for back-end.
- Primarily responsible for generating quizzes based off of uploaded e-texts using **JavaScript**.

Mikstap, Online cosmetic store

2018

*Worked with Shopify template using **HTML**, **Bootstrap**, and **JavaScript** to improve **UI & UX**.*

- Collaborated with other developers to create cleaner **interfaces**, experiences, and interactions.
- Primarily responsible for the logo and the landing page navigation bar of the website.

Applications

Meals for Me — Project Lead

*Mobile responsive recipe finder app built by using **ReactJS** and **PHP**.*

- Utilized **HTML** for basic skeleton and **Materialize CSS/media queries** to apply responsiveness and style to the application.
- As a **project owner**, implemented **Agile** project management and stand-ups to effectively communicate and include other developers' ideas & knowledge to create a great **UI/UX** and a high performance application.
- Developed modular and dynamic front end layout using **ReactJS** with **Redux** for ease of data manipulation.
- Utilized **ReactJS** to render recipes helping users to better internalize recipe instructions.

Checkers — Front-End Developer

*2-player checkers game created using mainly **JavaScript** and **jQuery**.*

- Incorporated **Agile** and **meistertask** to work effectively with the team within 48 hours deadline.
- Implemented core gameplay logic and game instance using **JavaScript**.
- Used **HTML**, **CSS**, **Bootstrap** to build the basic skeleton and style the application.
- Utilized **JavaScript** to dynamically build the checkerboard and update the checkerboard within **JavaScript** when the user moves/jumps over the checker pieces.
- Used **jQuery** to effectively select/append elements from **JavaScript** on to the DOM.

Omnifood

*A mobile responsive eCommerce food delivery service website with **HTML5**, **CSS3**, **JavaScript**.*

- Incorporated **HTML5**, **CSS3**, **JavaScript**, **jQuery** to build the basic layout of the pages.
- Improved **UI & styling** for better responsiveness across devices using **CSS3** and media queries.

Education

California State Long Beach - Bachelor of Arts in Interpersonal Communications

LearningFuze - Accelerated Web Development Program

- 1000+ hours of programming
